PROFESSIONAL SUMMARY

Final-year B.Tech CSE student (CGPA 8.7) with hands-on internship experience at Infosys Springboard and Salesforce. Proficient in full-stack development using Spring Boot, React, and Node.js, and in building GenAI applications with RAG pipelines, vector embeddings, and LLM integration. Seeking a software engineering role focused on backend architecture, API design, or intelligent application development.

EXPERIENCE

Backend Engineering Intern

June 2026 – Sep 2026

Infosys Springboard (Virtual)

Ongoing

- Engineered 8+ REST API endpoints in Java/Spring Boot within a microservices architecture, reducing service coupling across 3 modules and cutting query execution time by ~25% via JPA optimisations.
- Implemented service-layer components with JUnit test coverage achieving an 85%+ pass rate across CI pipelines, ensuring production-grade reliability.
- Authored Swagger/OpenAPI documentation enabling seamless handoffs between 2 cross-functional teams, reducing integration clarification cycles by 30%.

Salesforce Programming Intern

June 2025 – Aug 2025

Salesforce

- Built 5+ enterprise workflow applications using Apex triggers and Lightning Web Components (LWC), automating processes for 1,000+ records and reducing turnaround time by ~40%.
- Deployed REST API integrations connecting Salesforce with 2 external business systems, adhering to governor limits and bulki-fication best practices.
- Developed reusable LWC components and Apex classes to streamline data processing pipelines, improving team code reuse and reducing feature delivery time.

PROJECTS

ChatNova — AI-Powered Chat Application

React · Node.js · Groq LLM · MongoDB · JWT · SSE

[chatnova-tawny.vercel.app](#)

- Architected a full-stack GenAI chat app with real-time token streaming (SSE), achieving sub-200ms time-to-first-token via Groq LLM integration and serving 50+ test users across 3 concurrent sessions.
- Built a RAG pipeline for PDF Q&A using document chunking, vector embeddings, and cosine similarity search, achieving ~90% relevance accuracy on test documents.
- Implemented JWT authentication, persistent chat history, message regeneration, and voice input, delivering a production-ready GenAI product end-to-end.

MeetFlow — Real-Time Video Conferencing Platform

React · WebRTC · Socket.io · Node.js · MongoDB

[meetflow-eight.vercel.app](#)

- Built a P2P video platform supporting 10+ concurrent participants via WebRTC (STUN/TURN) with socket-based SDP/ICE signalling achieving sub-3s connection setup.
- Delivered screen sharing, camera/mic controls, and in-meeting chat with a responsive React UI cross-tested on Chrome, Firefox, and Safari.
- Designed scalable room management using Socket.io event architecture, enabling reliable multi-party session handling with minimal latency.

EDUCATION

B.Tech in Computer Science Engineering

July 2023 – 2027 (Expected)

Arya College of Engineering & IT, Jaipur

CGPA: 8.7 / 10.0

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python, SQL, HTML5, CSS3

Backend: Spring Boot, JPA, REST APIs, Microservices, Node.js, Express.js

Frontend: React.js, HTML5, CSS3, Responsive Design

Databases: PostgreSQL, MongoDB, MySQL

AI / GenAI: LLM Integration, RAG, Prompt Engineering, Groq API, Vector Embeddings

Platforms: Salesforce (Apex, LWC)

Tools: Git, Maven, Postman, Swagger/OpenAPI, JUnit, IntelliJ, VS Code, CI/CD

Auth & Protocols: WebRTC, Socket.io, JWT, SSE

Core CS: OOP, DSA, DBMS, Exception Handling, System Design

CERTIFICATIONS

Salesforce Programming Internship (Salesforce) • Generative AI for All (Infosys Springboard) • Full Stack Web Development • JavaScript Essentials (Cisco Networking Academy) • Data Structures & Algorithms (Apna College)
